

László Földvály

Senior Product Designer & Design Engineer

AI Experience Design · Agentic UX · Complex Systems

Designing is how I think. Building is how I prove it.

PROFESSIONAL SUMMARY

Senior Product Designer & Design Engineer focused on turning complex digital systems and AI-assisted workflows into clear, trustworthy, and controllable user experiences.

My background spans UX/UI design, design systems, industrial software, regulated digital products, fintech concepts, working MVPs, and AI-assisted product development. I combine interaction design, UX architecture, prompt-driven exploration, prototyping, and front-end understanding to move from abstract product ideas to testable digital experiences.

I am especially interested in AI Experience Design: designing interfaces where users need to understand what an AI system is doing, what it can access, when it needs confirmation, how errors are handled, and how trust, transparency, and control are maintained.

CORE COMPETENCIES

AI Experience Design · Agentic UX · Human-in-the-Loop Interaction · Trust, Transparency & Guardrails for AI-Assisted Products · Complex Systems UX · UX Architecture · Interaction Design · Conversational Flows · User Journeys · Clickable Prototypes · Design Systems · Reusable UI Components · Design-to-Code Workflows

PROFESSIONAL EXPERIENCE

Independent Product Design & Innovation

Senior Product Designer & Design Engineer | 2023 – Present

Designing and building independent digital products from problem framing to working MVPs, with a focus on UX architecture, AI-assisted prototyping, and front-end implementation.

Selected Product Case Studies

- **Designed and built foeldvary.com**, an interactive portfolio platform with multilingual project storytelling, custom UI patterns, AI-assisted design-to-code workflows, and an experimental AI bot for guided recruiter and visitor interaction.
- **Designed eWa Fintech Super App**, a complex fintech product concept translating wallet logic, service modules, onboarding flows, and financial product architecture into a clear, mobile-first user experience and working MVP.
- **Designed Bakery Live Tracker**, a real-time tracking platform that reduces user uncertainty by combining vehicle location, inventory visibility, and location-based notifications into a simple, trust-oriented experience.
- **Used LLMs and AI-assisted workflows** for UX exploration, design critique, prototyping, documentation, and front-end implementation — with a focus on clarity, feedback, confirmation, and user control.

Portfolio & Live Products:

SIEMENS (ETM: WinCC OA) Design System Lead & UI Designer

Industrial IoT & Critical Infrastructure Automation | Eisenstadt, Austria | 2018 - 2022

- Designed UX/UI foundations for complex industrial HMI/SCADA applications where operators needed clarity, orientation, and confidence across dense technical workflows.
- Created scalable UI components, icon libraries, visual standards, and reusable interface patterns for mission-critical industrial environments.
- Collaborated closely with software engineers and product stakeholders to translate system states, diagnostics, configuration workflows, and technical constraints into clear user interfaces.
- Improved consistency, developer handoff, and implementation quality through design guidelines, component logic, and structured visual standards.

GREENTUBE (NOVOMATIC INTERACTIVE) Senior UI/UX Designer

Regulated Digital Gaming Products | Vienna, Austria | 2008 - 2018

- Designed user interfaces, interaction patterns, game HUDs, and production-ready assets for a large portfolio of regulated desktop and mobile gaming products.
- Worked across 50+ shipped titles, balancing visual quality, fast feedback, player clarity, technical constraints, and platform requirements.
- Created wireframes, user flows, interactive prototypes, reusable UI assets, and final production graphics in close collaboration with product owners, developers, artists, and QA teams.
- Contributed to consistent interface patterns across multiple products, devices, game states, and interaction models.

EARLY PROFESSIONAL EXPERIENCE

Selected earlier work in touchscreen interface design, digital ergonomics, visual systems, motion design, and interaction-heavy digital products for Funworld AG, Amatic Industries, and Altova.

Selected work and project details: foeldvary.com

LANGUAGES & TECH STACK

- **Languages** German · English · Hungarian
- **Design & Collaboration** Figma · FigJam · Miro · Jira · Confluence · Adobe Creative Cloud
- **AI & Prototyping** GPT · Claude · Gemini · Prompt Engineering · AI-Assisted Prototyping · Design Critique · Documentation
- **Front-End & Deployment** React · Next.js · TypeScript · HTML · CSS · Tailwind · GitHub · Vercel · Netlify
- **AI Product Concepts** Conversational Interfaces · Tool Use Concepts · Confirmation Flows · Error Handling · Trust Cues · Guardrails

FOCUS

Designing clear, trustworthy, and controllable AI-assisted product experiences
from concept to prototype.
